

Kelvin Fong

Assistant Professor, Dalhousie University
kelvin.fong@dal.ca <https://kelvinfong.ca>

STATEMENT OF PURPOSE

Our surroundings and environmental exposures have considerable impacts on our health. Through environmental health and epidemiologic research, I study their health effects and investigate strategies to minimize detriments, especially among vulnerable populations.

EDUCATION

Doctor of Science, Harvard TH Chan School of Public Health, May 2018

Environmental Epidemiology, Department of Environmental Health
Committee: *Joel Schwartz (Chair), Francine Laden, Brent Coull, Petros Koutrakis*

Master of Science, ETH Zurich (Swiss Federal Institute of Technology), December 2012

Environmental Sciences: Human Health, Nutrition, and Environment

Honours Bachelor of Science, University of Toronto, June 2010

High distinction in Physiology and Music

CURRENT POSITION

Department of Earth and Environmental Sciences, Dalhousie University, Halifax, NS

Assistant Professor, January 2022 – present

Elizabeth May Chair in Sustainability and Environmental Health, January 2022 – present

Laboratory for Environmental Assessment in Public Health

- Launching independent research group to address the interactions between the environment (natural and anthropogenic) and human population health
- Measuring health-relevant environmental exposures in Halifax and Atlantic Canada
- Quantifying environmental health disparities across population strata, with a focus on vulnerable groups
- Designing and performing epidemiologic studies to estimate mortality and morbidity effects from exposure to air pollution, extreme temperatures, and other environmental stressors
- Estimating the causal effects of potential climate and environmental policies

RESEARCH EXPERIENCE**School of the Environment, Yale University**

Postdoctoral Associate, Michelle Bell Research Group, July 2018 – December 2021

Environmental Health Disparities in an Aging Population

- Assessed environmental exposures (*e.g.*, air pollution, temperature, green space) with large spatiotemporal data repositories for epidemiologic research
- Developed methods to reproducibly and efficiently perform spatial data linkage and analysis on computing clusters
- Estimated the air pollution and related mortality differences between native-born and foreign-born in the United States
- Wrote grants to fund research at the intersection of environmental and immigrant health

Department of Environmental Health, Harvard TH Chan School of Public Health

Graduate Research Assistant, September 2013 – May 2018

Environmental Exposures during Pregnancy and Birth Weight (Dissertation Focus)

- Conceptualized, designed, and performed data linkage (> 1 mil. records) of mothers' geographic information to air pollution predictions and environmental variables
- Applied quantile regression and showed that lighter newborns were more severely affected by particulate air pollution (PM_{2.5}) than average-weight or heavier newborns
- Assessed nonlinearity using splines and effect modification by socioeconomic status in the relationship between residential greenness exposure and birth outcomes
- Evaluated the relative toxicity of different constituents of PM_{2.5} on birth weight

Optimism and Healthy Aging (Collaboration with Social and Behavioral Sciences Department)

- Processed large sets of epigenetic data to compute methylation age
- Performed mixed effects models to understand how optimism affects the aging process

Neighborhood Social Stressors (Collaboration with Boston University)

- Investigated how neighborhood income and racial polarization affects birth weight outcomes directly and indirectly through environmental exposures

World Health Organization, European Center for Environment and Health

Intern, February 2013 – May 2013

- Compiled, edited, and formatted review of air pollution and health effects
- Authored conference paper on the health and economic impacts of environmental noise

Verenum Engineering Bureau (Zurich, Switzerland)

Pratikan, April 2011 – February 2012

- Wrote report on the health effects of wood combustion aerosols for the Swiss government

Division of Critical Care Medicine, St. Michael's Hospital (Toronto, Canada)

Summer Student, Summers 2007, 2008

- Assessed novel mechanical ventilation strategies' effects on diaphragm force generation

TEACHING EXPERIENCE**School of the Environment, Yale University***Postdoctoral Associate, July 2018 – present*

- Developing and teaching short courses on modern tools for environmental exposure assessment
 - *Scaling up Spatial Analyses: Using Google Earth Engine for Satellite Imagery Retrieval, Processing, and Analysis* [[link to webinar](#)]
 - *Data Analysis Workshop on Health and Demographic Surveillance Systems in Africa (forthcoming in 2022)*
- Mentoring PhD and MSc students
 - *On research projects: e.g., Childhood Air Pollution Exposure and Expected Adult Income, Modeling Air Pollution Exposure in India for Epidemiologic Studies*
 - *On career development: e.g., searching for a postdoctoral position*
- Participating in teaching, mentoring, and diversity workshops
 - *Difficult Conversations in the Classroom (Race, Ethnicity, and Culture)*
 - *Writing Across the Disciplines*
 - *Mentoring Training Course for Postdoctoral Fellows / Associates*
 - *Unconscious Bias*

Harvard College and Harvard TH Chan School of Public Health*Teaching Fellow / Assistant, February 2016 – May 2017*

- Led tutorials, labs, and graded student work in graduate and undergraduate classes
 - *Analysis of Case-Control and Cohort Studies*
 - *Analytical Methods and Exposure Assessment*
 - *Advanced Regression for Environmental Epidemiology*
 - *Energy and Climate: Vision for the Future*
 - *Environmental and Occupational Epidemiology*
- Revamped advanced regression course to use modern R packages and RMarkdown
- Developed teaching content on reproducible research and data science online course
 - *Principles, Statistical and Computational Tools for Reproducible Science*
- Completed training by the Bok Center for Teaching and Learning
 - *Active Approaches to Problem-Based Teaching*
 - *Teaching in General Education*

ETH Zurich (Swiss Federal Institute of Technology)*Teaching Assistant, February 2011 – May 2011*

- Edited course materials and graded student assignments and exams
 - *Environmental Impacts, Threshold Levels and Health Effects*

SELECTED PRESENTATIONS*Invited Seminars*

Fong KC. *Investigating Disparities in Environmental Exposures and Health Effects.* Department of Population Medicine, Harvard Medical School, 2021.

Fong KC. *Immigrant Health: Do Environmental Exposures Play a Role?* US EPA Air, Climate and Energy (ACE) Centers Meeting, 2020.

Fong KC. *Environmental Health Disparities: Do Our Surroundings Affect Us in Different Ways?* Mel and Enid Zuckerman College of Public Health, University of Arizona, 2020.

Fong KC. *Accelerating Exposure Assessment in Environmental Epidemiology.* Earth Engine Group @ Yale Seminar Series, 2019.

Fong KC. *Surrounding Residential Greenness and Birthweight.* Chinese University of Hong Kong, 2018.

Conference Presentations

Fong KC, Osgood C, Miranda ML, Bell ML. *Immigrant Disparities in Estimated Effects of Fine Particulate Matter on Birth Weight.* International Society for Environmental Epidemiology Conference, 2021.

Fong KC, Bell ML. *Disparities in Premature Deaths Attributable to Fine Particulate Matter (PM_{2.5}) Exposure between Immigrants to and those born in the United States.* International Society for Environmental Epidemiology Conference, 2020.

Fong KC, Lane KJ, Yitshak-Sade M, Kloog I, Hart JE, Fabian MP, Zanobetti A, Schwartz JD, Laden F. *Effect Modification of the PM_{2.5} Association with Birthweight by Local Residential Racial and Economic Segregation.* International Society of Exposure Science and International Society for Environmental Epidemiology Joint Conference, Ottawa, Canada, 2018.

Fong KC, James P, Kosheleva A, Schwartz JD. *Maternal Exposure to Greenness during Pregnancy and Birth Weight.* International Society for Environmental Epidemiology, Sydney, Australia, 2017.

Fong KC, Di Q, Kosheleva A, Kloog I, Schwartz JD. *Contributions to Low Birth Weight by the Constituents of Air Pollution.* International Society for Environmental Epidemiology, Rome, Italy, 2016.

AWARDS AND HONORS

Travel Award, International Journal of Environmental Research and Public Health, 2021

Reviewer Recognition (Top 15% Overall), Environmental Health Perspectives, 2020.

Travel Award, International Society for Environmental Epidemiology, 2017, 2019.

Harvard Graduate Consortium on Energy & Environment, Harvard University Center for the Environment, 2015-2017.

Benjamin Greeley Ferris, Jr Fellowship in Environmental Epidemiology, Harvard TH Chan School of Public Health, 2015.

Glickenhau Fund, Harvard TH Chan School of Public Health, 2014.

Doctoral Grant, Harvard TH Chan School of Public Health, 2013.

National Laureate, Excellence Awards, Canadian Merit Scholarship Foundation, 2008-2010.

Dean's List, University of Toronto, 2007-2010.

Dean's List, University of Washington, 2009.

Killam Fellowship, Fulbright Canada, 2009.

Finalist, St. Michael's Hospital Poster Competition, 2008.

Al Mercury Award, University of Toronto, 2008.

Walter and Mary Tuohy Award in Arts and Science, University of Toronto, 2008.

C.L. Burton Open Scholarship, University of Toronto, 2007
